The first section makes a distinction between trash transfer stations that are completely enclosed with lesser requirements and those that are either open on three sides or operate with their door open during the day having stricter requirements. Section two clarifies language regarding repair costs and replacement costs. Section three is a change in the Zoning Ordinance to the rural estate definition setting measurable requirements for an impediment to a sanitary sewer by a stream or river. The final section reduces the requirements for vegetation and buffer yards for temporary mining operations lasting less than twelve months. These amendments were unanimously approved by the Plan Commission and recommended by the staff.

PUBLIC COMMENT

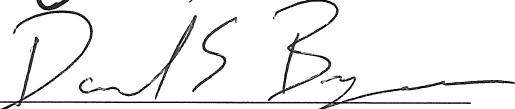

Area Planning Commission Director Sallie Fahey reported the Indiana Department of Natural Resources might have to buy some right-of-way on Swisher Road if approved for a Transportation Investment Generating Economic Recovery (TIGER) grant for the Department of Transportation, which might impact one of the potential sites for TEMA equipment storage the Commissioners are evaluating. In her opinion, it will only slightly impact the site, if at all.

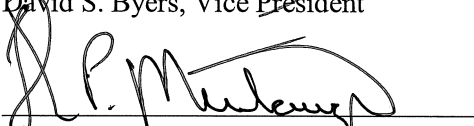

Commissioner Byers announced the county team for the Leukemia & Lymphoma Society will be holding a cookout on the roof of the parking garage on September 18th at 11:00 to raise funds and awareness.

- Commissioner Byers adjourned the meeting.
